TATA COFFEE	536.60	580.00	556.00	627.00	650.00	674.00

### **What is Swing Trading?**

Fast moving trending stocks tend to pause for a while before resuming their trend. Swing Trading involves taking a position in these stocks after their brief period of consolidation or correction for a quick 3 - 8% move in 1 - 5 trading days.

### **How to enter a Swing Trade**

Do not enter your orders immediately at the open. Wait for a few minutes for the market to settle down before entering your orders.

### **Entry techniques:**

Buy the stock the moment it trades above its "BUYABOVE" price. If the stock gaps up by more than 1% above the "BUYABOVE" price, we suggest you to ignore that trade and wait for another opportunity.

### **How to exit a Swing Trade**

#### **StopLoss:**

It is very important to place your stoploss order the moment you enter a trade. If you cannot afford the loss (difference between "BUYABOVE" and "STOPLOSS"), then either reduce the quantity of shares or wait for another suitable opportunity. The "StopLoss" mentioned above is good for the entire period of the trade and is to be used until you book profits. Once you book profits, please make sure to cancel the stoploss order.

#### **Booking Profits:**

We suggest you to book profits by selling 50% of your position at the "1Target" level, another 50% of your position at the "2Target" level and so on. As you keep booking profits make sure to reduce the quantity of shares that you place in your stoploss order, accordingly. You can also ride the rest of your trade using a trailing stop. After each day, move our stop-order to the low of that day.

**StopLoss:**

It is very important to place your stoploss order the moment you enter a trade. If you cannot afford the loss (difference between "SELLBELO" and "STOPLOSS" level), then either reduce the quantity of shares or wait for another suitable opportunity. The "StopLoss" mentioned above is good for the entire period of the trade and is to be used until you book profits. Once you book profits, please make sure to cancel the stoploss order.

**Booking Profits:**

We suggest you to book profits by covering 50% of your position at the "1Target" level, another 50% of your position at the "2Target" level and so on. As you keep booking profits make sure to reduce the quantity of shares that you place in your stoploss order, accordingly. You can also ride the rest of your trade using a trailing stop. After each day, move our stop-order to the high of that day.
